ABOUT US

EXCELLENCE THROUGH EXPERIENCE

LifeMed Medical Supplies and Equipment Co. Limited provides medical equipment and supplies to healthcare professionals, hospitals, clinics and individuals.

We specialise in a wide range of products that help practitioners reach the equipment and essential supplies they need to give patients better care. We prioritise quality, efficiency and customer satisfaction, and we work closely with healthcare providers so that they have access to current medical technologies and supplies.

Our goal is to bridge the gap between healthcare needs and accessible, high-quality medical products.

WHAT WE STAND FOR

01 QUALITY
Products we are willing to describe honestly, with specifications shown where they are confirmed.

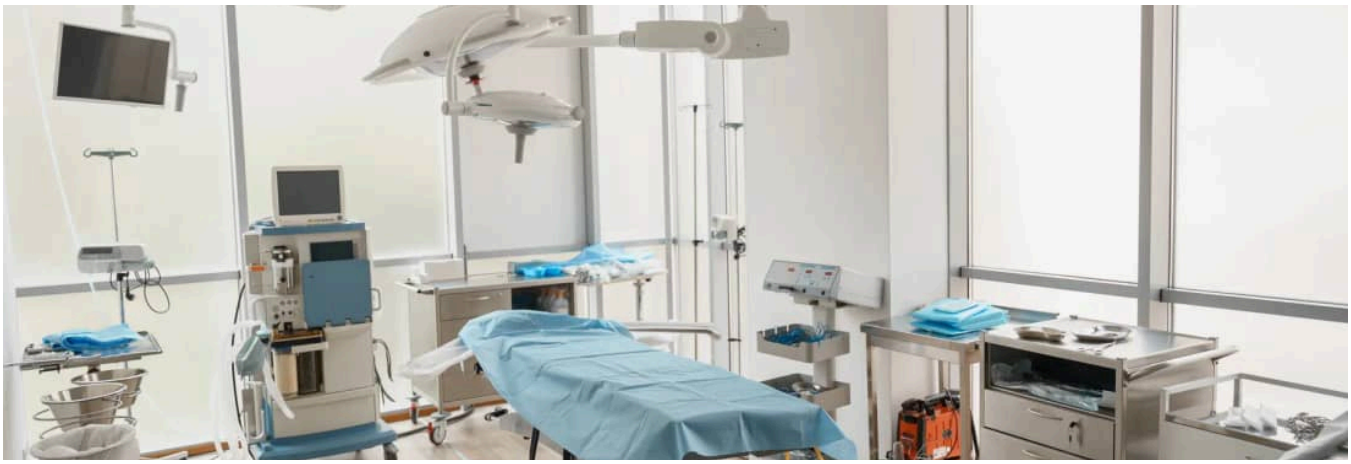

02 CUSTOMER FOCUS
We start from what you need and suggest the equipment that fits.

03 INTEGRITY AND TRUST
Honesty, transparency and ethical practice in every dealing.

04 RELIABILITY
Dependable service and clear communication, so long-term relationships are easy to keep.

05 RESPONSIBILITY
We support practices that make healthcare more accessible and are mindful of their effect on the environment.

06 SERVICE
Attentive support before and after the sale, so you know what will arrive and who to ask.

VISION

- To be a leading provider of medical supplies and equipment that strengthen healthcare services.
- To expand our range as the needs of the medical industry evolve.
- To be recognised for reliability, fair pricing and dependable service.
- To build long-term partnerships with healthcare institutions.

MISSION

- To provide quality medical products and services that improve patient care.
- To build strong partnerships with healthcare professionals and institutions.
- To make medical products more accessible and affordable for providers and individuals.
- To support customers with attentive service before and after the sale.

HOW TO ORDER

01
CHOOSE

Browse the sections of this catalogue and note the LifeMed reference of each product you want.

02
SEND

Send the list with quantities and your destination by WhatsApp, email or the quote form on the website.

03
RECEIVE

We reply with a quotation and answer your technical questions before you decide.

HOW TO READ AN ENTRY

Ref. is the LifeMed reference: quote it when you contact us. *Model* is the manufacturer's model where one applies. Specifications are listed only where we have confirmed them; anything not shown is *available on request*. Photographs are for illustration, so please confirm the exact specification and appearance when you request a quotation.

01 IMAGING & DIAGNOSTICS

See clearly, decide confidently.

ABOUT THIS SECTION

From film viewers to colour Doppler echo, this is the equipment that turns a clinician's question into a picture. We supply ultrasound systems, probes, printers and the lamps and trolleys that go with them, so a room can be made ready in one order rather than five.

WHO IT IS FOR

Diagnostic centres, new clinics fitting out a scan room, and hospitals adding a second or third machine.

A PRACTICAL TIP

Tell us which exams you plan to run most. That decides the probe set (convex, linear, cardiac) far more than the machine's headline price does.

SECTION Imaging & Diagnostics

X-RAY RADIOGRAPHY SYSTEM

A fixed X-ray radiography system for hospital imaging departments, clinics and diagnostic centres.

KEY FEATURES

- Examination table with a tabletop that extends beyond the base, giving the radiographer room to position the patient.
- X-ray tube unit with a collimator, carried on a column and horizontal arm that positions it over the table.
- Separate vertical wall stand with an image receptor holder for chest and other upright examinations.
- One room, two positions: lying and standing examinations without moving the patient to another unit.

SPECIFICATIONS

Type	**Fixed X-ray radiography system**
Configuration	**Examination table with column-mounted X-ray tube and a separate vertical wall stand**
X-ray tube unit	**X-ray tube with collimator on a horizontal arm**
Patient table	**Examination table with a tabletop that extends beyond the base**
On request	*Generator power, Tube voltage and current, Image receptor, Table dimensions and load and...*

REF. LM-IMA-002
SECTION Imaging & Diagnostics

PORTABLE ULTRASOUND MACHINE

A portable, laptop-style ultrasound machine for clinics, wards, emergency departments and mobile use.

KEY FEATURES

- Portable laptop-style design with a built-in carry handle, so one machine can serve several rooms.
- Colour screen that folds down over the control panel to protect it when the machine is moved or stored.
- Full control panel with a keyboard for entering patient details and notes, plus a trackball and control knobs for measurements and adjustments.
- Slider controls on the panel for quick image adjustment during the scan.

SPECIFICATIONS

Type	**Portable ultrasound machine, laptop style**
Display	**Colour screen that folds down over the control panel**
Controls	**Full keyboard, trackball, control knobs and slider controls**
Carrying	**Built-in carry handle**
Power	**Mains power inlet**
On request	*Screen size, Probes and ports, Imaging modes, Battery and 2 more*

REF. LM-IMA-003
SECTION Imaging & Diagnostics

TROLLEY-MOUNTED ULTRASOUND SYSTEM

A trolley-mounted ultrasound system for hospital imaging departments and larger clinics.

KEY FEATURES

- Trolley design with four castors and a push handle, so the system can be moved between rooms and positioned beside the patient.
- Flat-panel monitor on an articulating arm that can be positioned for the person scanning and for others in the room.
- Full control console with a keyboard, trackball and controls for measurements, annotations and image adjustment.
- Integrated displays on the console for quick access to common settings.

SPECIFICATIONS

Type	**Trolley-mounted ultrasound system**
Monitor	**Flat-panel monitor on an articulating arm**
Control panel	**Keyboard, trackball, controls and integrated displays**
Probe connections	**Several probe connectors on the front of the trolley**
Mobility	**Trolley with four castors and a push handle**
On request	*Monitor size, Probes, Imaging modes, Storage and connectivity and 2 more*

REF. LM-IMA-004
SECTION Imaging & Diagnostics

COMPACT PORTABLE ULTRASOUND SCANNER

A compact, laptop-style portable ultrasound scanner for clinics, wards, emergency departments and mobile use.

KEY FEATURES

- Compact laptop-style design with a built-in carry handle, so one scanner can serve several rooms.
- Wide colour screen with an adjustable viewing angle, and a body that closes up for transport and storage.
- Full control panel with a keyboard, trackball, control knobs and slider controls for measurements and image adjustment.
- Probe holder on the side of the unit keeps the probe and its cable within reach and out of the way.

SPECIFICATIONS

Type	**Compact portable ultrasound scanner, laptop style**
Display	**Wide colour screen with an adjustable viewing angle**
Controls	**Full keyboard, trackball, control knobs and slider controls**
Probe holder	**Probe holder on the side of the unit, with cable management**
Carrying	**Built-in carry handle**
On request	*Screen size, Probes, Imaging modes, Battery and 2 more*

MEDICAL FILM PRINTER WITH SUPPLY KIT

A large-format medical film printer for imaging departments, clinics and diagnostic centres that print scans on film.

KEY FEATURES

- Large-format printing, suited to medical images such as chest and CT scans printed on film.
- Top-loading sheet feeder that holds a stack of film, so several images can be printed in one run.
- Front output tray that delivers each printed image flat and ready to hand over.
- Refillable ink bottles in several colours, so the printer can be topped up rather than replaced.

SPECIFICATIONS

Type	**Large-format medical film printer with supply kit**
Printing method	**Ink printing with refillable ink bottles**
Paper and film feed	**Top-loading sheet feeder for film and print sheets**
Output	**Front output tray for printed images**
Typical use	**Printing medical scans, such as chest and CT images, on film**
On request	*Print size, Print quality, Film type and quantity, Connectivity and 2 more*

REF. LM-IMA-005
SECTION Imaging & Diagnostics

ULTRASOUND THERMAL PRINTER

A compact thermal printer for printing ultrasound images.

KEY FEATURES

- Prints ultrasound images on thermal paper, so no ink or toner needs to be bought or refilled.
- Compact desktop body that fits on the ultrasound trolley shelf or a nearby table.
- Roll paper loads under a lift-up top cover, so changing a roll is quick.
- Printed images feed out of a front slot, one after another on the same strip.

SPECIFICATIONS

Type	**Compact thermal printer for ultrasound images**
Printing method	**Thermal printing on roll paper**
Media	**Paper roll loaded under a lift-up top cover**
Output	**Printed images fed out of a front slot**
Controls	**Front control buttons and two adjustment knobs**
Display	**Small status display on the front panel**
Body	**Compact desktop unit, light-coloured casing**
On request	*Print size, Print quality, Paper type and roll size, Input connections and 2 more*

REF. LM-IMA-006
SECTION Imaging & Diagnostics

REF. LM-IMA-007

SECTION Imaging & Diagnostics

MOBILE ULTRASOUND TROLLEY

A mobile trolley for carrying a portable ultrasound machine from room to room.

KEY FEATURES

- Work platform with a push handle, so staff can steer the trolley with one hand.
- Three probe holders on the side of the platform keep probes and their cables within reach.
- Upright post with hooks to keep cables tidy and off the floor.
- Lower shelf and base tray for gel, paper, printer supplies and other accessories.

SPECIFICATIONS

Type	**Mobile trolley for an ultrasound machine**
Top platform	**Work platform with a push handle and a rim at the back**
Probe holders	**Three probe holders on the side of the platform**
Cable hook	**Upright post with hooks for cables**
Storage	**Lower shelf between the column legs, plus a base tray**
Frame	**Twin-column frame in grey, with a light-coloured platform and base**
Mobility	**Four twin-wheel castors, with brake pedals**
On request	*Compatible machines, Maximum load, Platform size, Height and adjustment and 1 more*

REF. LM-IMA-008

SECTION Imaging & Diagnostics

CART-TYPE ULTRASOUND SYSTEM

A cart-type ultrasound system for hospital imaging departments and larger clinics.

KEY FEATURES

- A large colour flat-panel monitor sits on an articulating arm, so it can be turned towards the operator or towards others in the room.
- Measurements and image settings are handled from a full panel: keyboard, trackball, rotary knobs and sliders.
- Built-in touchscreen on the control panel for quick access to common settings.
- Four probe connectors on the front of the cart, so several probes can stay connected during a busy list.

SPECIFICATIONS

Type	**Cart-type ultrasound system**
Main monitor	**Large flat-panel colour monitor on an articulating arm**
Control panel	**Keyboard, trackball, control knobs and slider controls**
Touchscreen	**Second display built into the control panel**
Probe connections	**Four probe connectors on the front of the cart**
Probe holders	**Holders on both sides of the control panel**
Storage	**Closed storage compartment in the cart body**
On request	*Monitor size, Probes and imaging modes, Storage and connectivity, Power supply and 1 more*

X-501 X-RAY OBSERVATION LAMP, TRIPLE SCREEN

Wall light box that lets radiologists read three films side by side.

KEY FEATURES

- Three viewing panels in a single housing
- Even backlighting that helps reveal fine detail on a film
- Fixed to the wall at reading height

SPECIFICATIONS

Available on request.

REF. **LM-IMA-009**
SECTION **Imaging & Diagnostics**

X-RAY OBSERVATION LAMP, SINGLE SCREEN

Bright, even film viewer for a consulting room or ward.

KEY FEATURES

- One bright panel for everyday films
- Small footprint for a clinic wall or bench
- Simple to switch on and use without training

SPECIFICATIONS

Available on request.

REF. **LM-IMA-010**
SECTION **Imaging & Diagnostics**

DIAGNOSTIC ULTRASOUND SYSTEM DP20 (CONVEX TRANSDUCER)

Mid-range ultrasound with a convex probe for abdominal and obstetric scans.

KEY FEATURES

- Convex transducer included for abdominal and obstetric work
- A linear probe can be added for superficial scans
- Pairs with a trolley and a thermal or film printer

SPECIFICATIONS

Available on request.

REF. LM-IMA-011
SECTION Imaging & Diagnostics

DIAGNOSTIC ULTRASOUND SYSTEM DP10 (CONVEX TRANSDUCER)

Compact ultrasound with a convex probe for everyday clinic scanning.

KEY FEATURES

- Compact system that fits a small scan room
- Convex probe supplied for general examinations
- Shares its linear probe option with the DP20

SPECIFICATIONS

Available on request.

REF. LM-IMA-012
SECTION Imaging & Diagnostics

LINEAR TRANSDUCER FOR DP10 AND DP20

Add-on probe for superficial scans such as vascular and small parts.

KEY FEATURES

- Made for the DP10 and DP20 machines
- High detail near the surface of the body
- Lets one scanner cover more types of examination

SPECIFICATIONS

Available on request.

REF. **LM-IMA-013**
SECTION **Imaging & Diagnostics**

HB112 CARDIAC 4D COLOR DOPPLER ECHOCARDIOGRAPHY MACHINE

Colour Doppler echo system for cardiac assessment.

KEY FEATURES

- Colour Doppler to show direction of blood flow
- 4D imaging for a fuller view of the heart
- Intended for cardiology use

SPECIFICATIONS

Available on request.

REF. **LM-IMA-014**
SECTION **Imaging & Diagnostics**

02
THEATRE & SURGICAL

Light, position and suction for the surgical field.

ABOUT THIS SECTION

Operating tables, surgical and examination lights, suction and traction frames: the fixed kit of a theatre or procedure room. We help you match ceiling or mobile lighting to your room, and tables to the procedures your surgeons actually perform.

WHO IT IS FOR

Day-surgery centres, dental and cosmetic clinics, hospitals refurbishing a theatre.

A PRACTICAL TIP

Check ceiling height and structure before choosing a ceiling light. Send us a photo or the dimensions and we will tell you what fits.

REF. LM-THE-001
SECTION Theatre & Surgical

SURGICAL POSITIONING PAD

Ergonomic surgical positioning pads in several sizes, for stable, comfortable positioning and a clear surgical field.

KEY FEATURES

- Ergonomic design with various specifications for stable, comfortable patient positioning and an optimal surgical field, helping shorten surgery time.
- Made of polymer gel and film with good softness, pressure and shock resistance; helps disperse pressure and reduce bedsore and nerve-compression risk.
- X-ray translucent, waterproof, insulated, non-conductive. Latex-free, anti-bacterial, non-allergenic, without plasticizer.
- Temperature tolerance –18°C to +55°C. Easy to clean with non-corrosive disinfectant. Do not fumigate or use high-temperature / high-pressure sterilisation.

SPECIFICATIONS

Material	**Polymer gel and film**
Properties	**X-ray translucent, waterproof, insulated, non-conductive, latex-free, anti-bacterial, non-allergenic, plasticizer-free**
Temperature tolerance	**–18°C to +55°C**
Cleaning / disinfection	**Easy to clean; use non-corrosive disinfectant. Do not use fumigation, high-temperature, or high-pressure sterilisation**

REF. LM-THE-002
SECTION Theatre & Surgical

ORTHOPAEDIC TRACTION FRAME

An orthopaedic traction frame for use with operating tables in orthopaedic and trauma theatres.

KEY FEATURES

- Stainless steel frame that is strong, stable and easy to wipe down between procedures.
- Two padded boot-style limb holders that can be positioned independently for each leg.
- Hand-crank adjusters for setting and fine-tuning the position of the holders.
- Padded support post on a height-adjustable column, to suit different patients and procedures.

SPECIFICATIONS

Type	**Orthopaedic traction frame for operating tables**
Frame	**Stainless steel frame, adjustable in length and height**
Traction adjustment	**Hand-crank adjusters for setting the position of the limb holders**
Foot and leg holders	**Two padded boot-style holders that can be set independently**
Support post	**Padded post on a height-adjustable column at one end**
On request	*Compatible operating tables, Traction and adjustment range, Maximum load, Dimensions and...*

REF. LM-THE-003
SECTION Theatre & Surgical

CEILING-MOUNTED LED SURGICAL LIGHT

A ceiling-mounted double-dome LED surgical light for operating theatres and procedure rooms.

KEY FEATURES

- Double-dome design: a larger main light and a smaller satellite light, so the surgical site can be lit from more than one direction.
- LED array in each dome, made up of many individual LEDs spread across the face of the light.
- Articulated arms with rotating joints let each dome be moved, tilted and held where the surgeon needs it.
- Central handle in each dome for positioning the light.

SPECIFICATIONS

Type	**Ceiling-mounted LED surgical light, double dome**
Light source	**LED array in each dome, made up of many individual LEDs**
Heads	**Two domes of different sizes, a larger main light and a smaller satellite light**
Mounting	**Ceiling mount with a central canopy**
Arms	**Two articulated arms with rotating joints, one for each dome**
On request	*Illuminance and spot size, Colour temperature and colour rendering, Dome diameters and LE...*

REF. LM-THE-004
SECTION Theatre & Surgical

MOBILE LED EXAMINATION LAMP

A mobile LED examination lamp for clinics, consulting rooms, wards and minor procedures.

KEY FEATURES

- Flexible gooseneck arm that bends and stays where it is set, so the light can be aimed precisely.
- LED ring around a central lens for even, focused lighting of the examination area.
- Vented lamp head to help keep the light cool during long use.
- Column with an adjustment joint, so the height can be set for a seated or standing examination.

SPECIFICATIONS

Type	**Mobile LED examination lamp on a stand**
Light source	**LED ring around a central lens**
Arm	**Flexible gooseneck arm that holds its position**
Lamp head	**Vented lamp head, white housing**
Stand	**Vertical column with an adjustment joint for height**
Base	**Five-leg base with five castors**
Power cable	**Cable with a clip for storing the loop of cable on the column**
On request	*Illuminance and spot size, Colour temperature, Number of LEDs and lifetime, Height range...*

AMSCO-3085 SP SURGICAL TABLE

Multi-position operating table for general surgical theatres.

KEY FEATURES

- Adjustable sections for patient positioning
- Suited to general surgical theatres
- Pairs with a ceiling light and instrument trolley

SPECIFICATIONS

Available on request.

REF. **LM-THE-005**
SECTION **Theatre & Surgical**

SHADOWLESS OPERATING LED COLD LIGHT

Cool, shadow-free lighting over the surgical field.

KEY FEATURES

- Shadow-reducing light over the operating field
- Cool LED source that stays comfortable for the team
- Used in theatres and procedure rooms

SPECIFICATIONS

Available on request.

REF. **LM-THE-006**
SECTION **Theatre & Surgical**

ELECTRIC OPERATING TABLE

Motorised table whose height and tilt adjust at the touch of a control.

KEY FEATURES

- Powered height and tilt from a hand control
- Smooth repositioning without manual cranking
- A good fit where theatres run many cases a day

SPECIFICATIONS

Available on request.

REF. **LM-THE-007**

SECTION **Theatre & Surgical**

03 BEDS & PATIENT CARE

Comfort for patients, relief for the people caring for them.

ABOUT THIS SECTION

Hospital and examination beds, pressure-relief mattresses, turning aids and commode chairs. Care at the bedside is physical work, and the right bed or aid protects both the patient's skin and the carer's back.

WHO IT IS FOR

Hospitals and nursing homes, home-care providers, and families setting up care at home.

A PRACTICAL TIP

Manual, two-crank or fully electric is mostly a question of how often staff reposition the patient in a day. Tell us the routine and we will suggest a fit.

SECTION **Beds & Patient Care**

4 MOTORS HOSPITAL PATIENT BED

Fully electric bed; four motors adjust back, knee and height.

KEY FEATURES

- Four motors for back, knee and height
- Handset control for patient or nurse
- Reduces manual handling for staff

SPECIFICATIONS

Available on request.

REF. **LM-BED-003**
SECTION **Beds & Patient Care**

ABS DOUBLE CRANK BED

Manual bed with two cranks and easy-clean ABS panels.

KEY FEATURES

- Two cranks: backrest and knee section
- ABS head and foot panels that wipe clean
- Simple mechanics, easy to maintain

SPECIFICATIONS

Available on request.

REF. **LM-BED-004**
SECTION **Beds & Patient Care**

EXAMINATION BED WITH BACK REST

Clinic couch with an adjustable back rest.

KEY FEATURES

- Back rest raises for seated examinations
- Firm padded surface that wipes clean
- Fits a standard consulting room

SPECIFICATIONS

Available on request.

REF. **LM-BED-005**
SECTION **Beds & Patient Care**

EXAMINATION BED

Flat, sturdy couch for examinations and minor procedures.

KEY FEATURES

- Stable flat surface without moving parts
- Quick to wipe down between patients
- A low-cost way to furnish an extra room

SPECIFICATIONS

Available on request.

REF. **LM-BED-006**
SECTION **Beds & Patient Care**

SECTION **Beds & Patient Care**

04 ANAESTHESIA, GAS & SUCTION

Breathing support and clear airways in theatre and ward.

ABOUT THIS SECTION

Anaesthesia machines, oxygen regulators with flowmeters, mobile suction and the breathing circuits that connect patients to them. Equipment that sits on the critical path of a procedure, so servicing and compatibility matter as much as price.

WHO IT IS FOR

Operating theatres, recovery rooms, intensive care and emergency departments.

A PRACTICAL TIP

Check gas connections and the breathing-circuit type your team already uses before you choose a machine.

SECTION Anaesthesia, Gas & Suction

ANAESTHESIA MACHINE

A mobile anaesthesia machine for operating theatres and procedure rooms.

KEY FEATURES

- Mobile design: a stable base with castors lets staff move the machine between theatres and position it at the head of the table.
- Colour display screen on the front of the unit, placed at eye level for easy monitoring.
- Flowmeters and pressure gauges within easy reach for controlling and checking gas delivery.
- Agent vaporizer mounted on the machine, so the anaesthetic agent is delivered from the same unit.

SPECIFICATIONS

Type	**Mobile anaesthesia machine**
Display	**Colour display screen**
Gas control	**Flowmeters with pressure gauges**
Anaesthetic agent	**Agent vaporizer mounted on the machine**
Breathing system	**Absorber canister with breathing circuit connections**
Mobility	**Mobile base with castors**
Storage	**Wire basket on the column**
On request	*Gas connections, Power supply, Ventilation modes*

REF. LM-ANA-002

SECTION Anaesthesia, Gas & Suction

OXYGEN REGULATOR WITH FLOWMETER

An oxygen regulator with flowmeter for hospitals, clinics, ambulances and home-care use with oxygen cylinders.

KEY FEATURES

- Pressure gauge in a green rubber boot protects the dial and makes the cylinder pressure easy to read.
- Coloured zones on the gauge scale show at a glance when the cylinder is running low.
- Clear glass flowmeter with a printed scale shows the flow being delivered.
- Green control valve for setting and adjusting the flow.

SPECIFICATIONS

Type	**Oxygen regulator with flowmeter**
Cylinder pressure gauge	**Dial gauge with a green rubber protective boot and coloured zones on the scale**
Flowmeter	**Clear glass tube with a printed scale**
Flow control	**Green control valve for setting the flow**
Body	**Chrome-plated metal body**
Cylinder connection	**Threaded inlet with nut, for connection to the cylinder valve**
On request	*Flow range, Inlet pressure rating, Inlet connection standard, Outlet connection and 1 more*

REF. LM-ANA-003

SECTION Anaesthesia, Gas & Suction

MOBILE SUCTION MACHINE

A mobile electric suction machine for operating theatres, emergency departments and wards.

KEY FEATURES

- Two large transparent collection jars with printed volume scales, so the amount collected can be seen at a glance.
- Jars have lids and carrying handles, so they can be lifted off for emptying and cleaning.
- Vacuum gauge on the control head shows the working vacuum.
- Power switch with an indicator light and a regulator knob for setting the vacuum.

SPECIFICATIONS

Type	**Mobile electric suction machine with two collection jars**
Collection jars	**Two large transparent jars with printed volume scales, lids and carrying handles**
Vacuum gauge	**Dial gauge on the control head**
Controls	**Power switch with indicator light and a vacuum regulator knob**
Frame	**Metal column frame that holds the jars and tubing**
On request	*Maximum vacuum, Suction flow rate, Jar capacity, Power supply and 1 more*

REF. LM-ANA-004

SECTION Anaesthesia, Gas & Suction

ANAESTHETIC TROLLEY

An anaesthetic trolley for operating theatres and anaesthetic rooms.

KEY FEATURES

- Drawers of different heights, some full width and some half width, so ampoules, syringes and consumables can be sorted by size.
- Rack of clear tilt-out bins on top, so small items can be seen and reached at a glance.
- Flat worktop with a raised edge and a rail around it, so items stay in place while the trolley moves.
- Moulded blue pull handles that are easy to grip and to wipe clean.

SPECIFICATIONS

Type	**Anaesthetic trolley with drawers and clear storage bins**
Body	**White body with blue trim and blue drawer handles**
Drawers	**Stack of drawers of different heights down the front, some full width and some half width, each with a moulded blue pull handle**
Clear bins	**Two rows of five clear tilt-out bins in a rack on top of the trolley, about ten in total**
On request	*Overall dimensions, Exact number of drawers and their sizes, Body material, Load capacity...*

SECTION Anaesthesia, Gas & Suction

HEATED DISPOSABLE BREATHING CIRCUIT

A heated disposable breathing circuit, for connecting a patient to a ventilator or anaesthesia machine in intensive care and theatre.

KEY FEATURES

- Two flexible corrugated tubes that bend without kinking.
- Blue and white colouring helps identify the inspiratory and expiratory limbs.
- Connectors at both ends for attaching to the machine and the patient.
- Small port and adapter for monitoring or humidification.

SPECIFICATIONS

Type	**Disposable breathing circuit, described as heated**
Tubes	**Two flexible corrugated tubes**
Colours	**Blue and white**
Connectors	**Connectors at each end of both tubes**
Extras	**Small side port and a separate adapter piece**
On request	*Tube length and diameter, Heating wire details and power connection, Connector sizes (adu...*

SECTION Anaesthesia, Gas & Suction

SILICON BABY INHALER

A silicon baby inhaler, a spacer chamber with a soft face mask for giving inhaled medication to babies and small children.

KEY FEATURES

- Clear chamber lets you see the medication mist and the baby's breathing valve.
- Soft, wide mask designed to sit gently over a baby's nose and mouth.
- Yellow base and cap make the parts easy to see and identify.
- Silicone mask, as named, that is soft against the skin.

SPECIFICATIONS

Type	**Spacer chamber with a face mask, for babies**
Chamber	**Clear plastic chamber**
Mask	**Soft, wide mask on top (silicone, as named)**
Base	**Yellow base valve piece**
Side port	**Yellow cap on the side for the inhaler connection**
On request	*Chamber volume and dimensions, Silicone grade and other materials, Valve type, Age range...*

05 MONITORING & RESPIRATORY

Small devices that answer big questions.

ABOUT THIS SECTION

Blood pressure monitors, pulse oximeters, nebulisers and oxygen regulators. These are the instruments used again and again in every consultation, and the ones families keep at home for chronic conditions.

WHO IT IS FOR

Clinics, pharmacies, homecare agencies and patients managing blood pressure or respiratory conditions at home.

A PRACTICAL TIP

For home use, pick the monitor the patient finds easiest to read. A device that is used daily beats a more advanced one that is not.

REF. LM-MON-001
MODEL 270S
SECTION Monitoring & Respiratory

INBODY 270S BODY COMPOSITION ANALYZER

The InBody 270S is a professional, foldable body composition analyzer.

KEY FEATURES

- Direct segmental measurement: right arm, left arm, trunk, right leg and left leg are analysed separately, with no estimates based on age, sex or body type.
- 15 impedance measurements from 3 frequencies (20, 50 and 100 kHz) across 5 body segments.
- Results in about 30 seconds: weight, total body water, dry lean mass, body fat mass, skeletal muscle mass, BMI, percent body fat, segmental lean analysis and whole-body phase angle.
- 7-inch colour touchscreen with a voice guidance system that walks the person through the test.

SPECIFICATIONS

Size	L796 × W356 × H995 mm
Technology	Direct Segmental Multi-Frequency BIA (DSM-BIA)
Electrodes	Tetrapolar 8-point tactile electrodes
Frequencies	20 kHz, 50 kHz, 100 kHz
Impedance measurements	15 (3 frequencies × 5 segments)
Measured segments	Right arm, left arm, trunk, right leg, left leg
Test time	About 30 seconds

REF. LM-MON-002
SECTION Monitoring & Respiratory

UA-1020 UPPER ARM BLOOD PRESSURE MONITOR WITH AFIB SCREENING AND TRI-CHECK

Digital upper-arm monitor with AFib screening and tri-check readings.

KEY FEATURES

- Upper-arm cuff for accurate readings
- Screens for atrial fibrillation
- Tri-check takes three readings in sequence

SPECIFICATIONS

Available on request.

HAND HELD PULSE OXIMETER

Handheld unit for spot-checking oxygen saturation and pulse.

KEY FEATURES

- Handheld unit with a separate probe
- Shows oxygen saturation and pulse rate
- Good for ward rounds and clinics

SPECIFICATIONS

Available on request.

REF. **LM-MON-003**
SECTION **Monitoring & Respiratory**

PORTABLE NEBULIZER

Small nebuliser for taking respiratory medication at home or on the move.

KEY FEATURES

- Compact enough to carry
- Turns liquid medication into an inhalable mist
- Used for asthma and other airway conditions

SPECIFICATIONS

Available on request.

REF. **LM-MON-004**
SECTION **Monitoring & Respiratory**

NEBULIZER MACHINE

Compressor nebuliser for respiratory therapy.

KEY FEATURES

- Compressor-driven for steady output
- Suited to longer treatment sessions
- Used in clinics and by patients at home

SPECIFICATIONS

Available on request.

REF. **LM-MON-005**
SECTION **Monitoring & Respiratory**

PULSE OXIMETER

Fingertip meter for oxygen saturation and heart rate.

KEY FEATURES

- Clips onto a fingertip
- Reads oxygen saturation and heart rate
- Easy enough for home use

SPECIFICATIONS

Available on request.

REF. **LM-MON-006**
SECTION **Monitoring & Respiratory**

ELECTRONIC SPHYGMOMANOMETER

Electronic blood pressure monitor.

KEY FEATURES

- Automatic cuff inflation
- Result shown on a display
- No stethoscope needed

SPECIFICATIONS

Available on request.

REF. LM-MON-007
SECTION Monitoring & Respiratory

MANUAL ARM BLOOD PRESSURE CUFF WITH STETHOSCOPE (ANEROID SPHYGMOMANOMETER)

Classic aneroid kit with cuff, gauge and stethoscope.

KEY FEATURES

- Cuff, aneroid gauge and stethoscope together
- Works without batteries
- Used by clinicians trained in manual measurement

SPECIFICATIONS

Available on request.

REF. LM-MON-008
SECTION Monitoring & Respiratory

06 LABORATORY

Dependable basics for the bench.

ABOUT THIS SECTION

Centrifuges and temperature-controlled storage are the quiet workhorses of a small laboratory. We stock benchtop centrifuges and a Bluetooth-enabled lab fridge so your samples are spun and stored properly from day one.

WHO IT IS FOR

Clinic labs, blood collection points, small diagnostic labs and teaching facilities.

A PRACTICAL TIP

Count the tubes you spin in a typical hour. It tells you the rotor size you need before anyone talks about speed.

IN THIS SECTION · 6 PRODUCTS

SECTION Laboratory

URINE ANALYZER

A compact benchtop urine analyzer for clinics, laboratories and hospital wards.

KEY FEATURES

- Compact benchtop design that fits on a laboratory bench or clinic desk.
- Slide-out strip tray on the side: place the dipped test strip and the analyzer reads it.
- Backlit LCD display that shows the operating messages and the results.
- Numeric keypad with function keys and an Enter key for entering sample numbers and running tests.

SPECIFICATIONS

Type	**Benchtop urine analyzer (test strip reader)**
Display	**Backlit LCD text display**
Keypad	**Numeric keypad with function keys and an Enter key**
Test strip handling	**Slide-out strip tray on the right-hand side**
Printer	**Built-in printer with a paper compartment on the top of the unit**
Body	**Compact benchtop unit, white casing with a dark base**
On request	*Test strips supported, Parameters measured, Testing speed, Memory and 3 more*

MODEL 800-1
SECTION Laboratory

LABORATORY CENTRIFUGE 800-1

The 800-1 is a compact benchtop laboratory centrifuge for clinics, laboratories and blood collection points.

KEY FEATURES

- Speed adjustable up to 4,000 rpm, giving relative centrifugal force of about 1,790 ×g for everyday separation work.
- Timer from 0 to 60 minutes, set with a simple front knob.
- Fixed-angle rotor takes six 20 ml tubes, 120 ml in total, per run.
- Two-knob control on a clearly labelled front panel: one for speed, one for time.

SPECIFICATIONS

Size	**L245 × W245 × H230 mm (typical for this model)**
Type	**Benchtop low-speed laboratory centrifuge**
Maximum speed	**4,000 rpm, adjustable with a speed knob**
Maximum relative centrifugal...	**About 1,790 ×g**
Timer	**0–60 minutes, set with a timer knob**
Rotor and capacity	**Fixed-angle rotor, 6 tubes × 20 ml (120 ml)**
Controls	**Two front knobs: speed and timer, on a labelled front panel**
On request	*Voltage and plug, Weight*

SECTION Laboratory

REFRIGERATED LABORATORY CENTRIFUGE

A benchtop refrigerated laboratory centrifuge for laboratories, blood banks and research work where samples must stay cool while they spin.

KEY FEATURES

- Refrigerated chamber keeps samples cool during the run, for temperature-sensitive work.
- Stainless steel chamber with a rubber seal around the opening, easy to keep clean.
- Hinged lid opens upwards for easy loading and unloading of the rotor.
- Rotor with a ring of tube positions for spinning several tubes in one run.

SPECIFICATIONS

Type	**Benchtop refrigerated laboratory centrifuge**
Cooling	**Refrigerated chamber, with ventilation grilles for the cooling system**
Chamber	**Stainless steel chamber with a rubber seal around the opening**
Lid	**Hinged lid that opens upwards, in a contrasting blue**
Rotor	**Rotor with a ring of tube positions**
Display	**LCD display for speed, time and temperature**
On request	*Maximum speed and RCF, Temperature range, Capacity and rotors, Timer and 2 more*

07 TROLLEYS & WARD FURNITURE

Everything within arm's reach, nothing in the way.

ABOUT THIS SECTION

Nursing, anaesthetic, emergency and instrument trolleys, IV stands, over-bed tables, cabinets and folding screens. This is the furniture that keeps a ward moving and a patient's privacy intact, built mostly from stainless steel and tough, wipe-clean materials.

WHO IT IS FOR

Wards, emergency rooms, outpatient clinics, and anyone furnishing a treatment room from scratch.

A PRACTICAL TIP

List the drawers, shelves and hooks you need before you choose a model. A trolley is only as good as the layout you can work from.

MOBILE IV STAND

A mobile IV stand for wards, emergency departments, theatres and clinics.

KEY FEATURES

- Telescopic pole that adjusts to the height you need and locks with a hand knob.
- Hooks at the top hold infusion bags; a four-hook version is available on request.
- Four-leg cross base for a stable footprint that stays upright when moved.
- Four castors let staff move the stand smoothly with the patient.

SPECIFICATIONS

Type	Mobile IV stand (infusion stand) on castors
Pole	Polished metal telescopic pole
Height adjustment	Telescopic, locked in position with a hand knob
Hooks	Hooks at the top for hanging infusion bags; two-hook top, four-hook version on request
Base	Four-leg cross-shaped metal base
Mobility	Four castors, one at the end of each leg
Finish	Polished chrome-look metal finish
On request	*Height range, Maximum load, Base size, Material grade and 1 more*

SECTION Trolleys & Ward Furniture

MULTI-FUNCTIONAL PATIENT TURNING DEVICE

A multi-functional patient turning device, a foam-filled positioning aid for wards, long-term care and home nursing.

KEY FEATURES

- U-shaped body with two side arms and a raised centre support that cradles the patient.
- Curved base allows a gentle rocking movement, so carers can turn and hold a patient with less effort.
- Foam-filled body that is soft against the patient and holds its shape.
- Smooth green cover that wipes clean between patients.

SPECIFICATIONS

Type	Patient turning and positioning aid for use in bed
Shape	U-shaped padded body with two side arms and a raised centre support
Base	Curved base that allows a gentle rocking movement
Filling	Foam-filled
Cover	Smooth green wipe-clean cover
Fastening	Side flap and seam panel on the sides

NURSING TROLLEY

A stainless steel nursing trolley for wards, treatment rooms and clinics.

KEY FEATURES

- Stainless steel frame and shelves, strong enough for daily use and quick to wipe down.
- Two flat shelves for instruments, dressings, medication trays and supplies.
- Raised rail around three sides of the top shelf helps keep items in place, with one open side for easy reach.
- Four swivel castors with grey wheels for smooth, quiet movement.

SPECIFICATIONS

Type	**Two-shelf stainless steel nursing trolley on castors**
Material	**Stainless steel tube frame and stainless steel shelves**
Shelves	**Two flat shelves, upper and lower**
Top shelf edge	**Raised rail around three sides of the top shelf, open on one long side**
Frame	**Four round tube legs joined to the shelves**
Castors	**Four swivel castors with grey wheels, some with a locking brake**
On request	*Overall dimensions, Shelf size, Load capacity per shelf, Stainless steel grade and 2 more*

SECTION **Trolleys & Ward Furniture**

EMERGENCY TROLLEY

An emergency (crash) trolley for wards, emergency departments and resuscitation areas, where drugs and equipment must be ready and easy to find.

KEY FEATURES

- Five drawers on the front keep drugs and emergency supplies sorted and ready.
- Red security seals and a key lock help show that the trolley is complete and has not been opened.
- Blue label strips on each drawer for quick identification of the contents.
- Large, flat top with a raised edge and a rail, so equipment stays put while the trolley moves.

SPECIFICATIONS

Type	**Emergency (crash) trolley with drawers, side accessories and an IV pole**
Body	**Blue moulded top and frame with grey drawer fronts and a stainless-look side rail**
Drawers	**Five drawers stacked down the front, four shallow and one deep, with blue label strips**
Drawer security	**Red breakaway-style security seals and a key lock on the side**
On request	*Overall dimensions, Drawer sizes and layout, Body material, Load capacity and 1 more*

08 SURGICAL INSTRUMENTS

Stainless instruments for the surgeon's hand.

ABOUT THIS SECTION

Stainless steel surgical instrument sets, pistol-grip instruments and a microsurgical set in a carrying case. Instruments are chosen by the hand that uses them, so tell us the specialty and we will suggest the right set.

WHO IT IS FOR

Surgical teams, day-surgery centres, teaching hospitals and veterinary clinics.

A PRACTICAL TIP

Ask for the instrument list by name and quantity; sets differ between specialties more than people expect.

09 MOBILITY AIDS

Helping people get back on their feet, or around without them.

ABOUT THIS SECTION

Wheelchairs (manual and electric), walkers, crutches, walking sticks and a cervical collar. Mobility aids are personal: height, weight and daily routine all matter, so we would rather ask a few questions than sell the wrong frame.

WHO IT IS FOR

Physiotherapy centres, pharmacies, rehabilitation units, and individuals recovering from injury or surgery.

A PRACTICAL TIP

Measure the user's height and the narrowest doorway they use at home. Those two numbers prevent most returns.

ELECTRIC WHEELCHAIR MK-6002A

A battery-powered folding wheelchair, the MK-6002A suits hospitals, care homes and home use where the user cannot propel a chair by hand.

KEY FEATURES

- Joystick controller on the armrest for one-hand steering.
- The large rear wheels are driven by battery power, so there is no need to propel the chair by hand.
- Silver metal frame that folds down to store or transport the chair.
- Black padded, breathable seat and backrest with yellow-orange trim.

SPECIFICATIONS

Type	**Electric (powered) wheelchair with a foldable frame**
Drive	**Battery-powered, driven through the large rear wheels, which have a red hub cap**
Control	**Joystick controller on the armrest**
Frame	**Silver-coloured metal frame, foldable, with orange-marked adjustable leg supports**
Seat and backrest	**Black padded, breathable fabric seat and backrest with yellow-orange trim**
Armrests	**Padded armrests; one side carries the joystick**

ALUMINIUM WALKER WITH WHEELS

An aluminium walker with wheels, for people who need extra support and stability when walking, in hospitals, rehabilitation, care homes and at home.

KEY FEATURES

- Light aluminium frame that is easy to lift, carry and wipe clean.
- Grey padded hand grips on both side frames for a comfortable hold.
- Front cross-brace with two folding hinges, so the walker folds flat for storage and transport.
- Adjustable-height legs to suit different users.

SPECIFICATIONS

Type	**Folding walker (walking frame) with front wheels**
Frame material	**Aluminium tube frame, silver-coloured**
Hand grips	**Grey padded grips on both top rails**
Side frames	**Two side frames, each with a lower cross-bar**
Front cross-brace	**Front cross-brace with two folding hinges, so the walker folds flat**
Height adjustment	**Adjustable-height legs with a grey collar at each leg joint**
Front wheels	**Two fixed grey wheels on the front legs**

ALUMINUM CRUTCH

An aluminium underarm crutch, supplied as a pair, for people who need support while an injury heals, in hospitals, rehabilitation and at home.

KEY FEATURES

- Light aluminium frame that is easy to carry and wipe clean.
- Grey padded, curved underarm pads that sit comfortably under the arm.
- Padded hand grips across the middle of the frame, for a secure hold and weight-bearing.
- Two uprights that join into a single lower leg for a strong, stable frame.

SPECIFICATIONS

Type	**Underarm (axillary) crutches, supplied as a pair**
Frame material	**Aluminium, silver-coloured**
Underarm pads	**Grey padded, curved top pads**
Hand grips	**Grey padded hand grips across the middle of the frame**
Frame shape	**Two uprights that join into a single lower leg**
Height adjustment	**Adjustable-height lower leg, with a row of holes and a clip for setting the height**
Tips	**Grey rubber tips at the foot**
On request	*Height range, Suitable user height, Maximum user weight, Sizes available and 1 more*

REF. LM-MOB-006
SECTION Mobility Aids

ELBOW CRUTCH

An elbow (forearm) crutch, for people who need lasting support while walking, in rehabilitation, long-term use and at home.

KEY FEATURES

- Forearm cuff shares the load between the hand and the forearm, so less weight goes through the wrist.
- Open C-shaped cuff, moulded in one piece with the handle.
- Angled black handle with a ridged surface for a secure grip.
- Polished telescopic metal shaft that is light and easy to wipe clean.

SPECIFICATIONS

Type	**Elbow (forearm) crutch**
Shaft	**Polished metal tube (aluminium-look), telescopic**
Forearm cuff	**Black, open C-shaped cuff, moulded together with the handle**
Handle	**Black moulded handle with a ridged grip, set at an angle to the shaft**
Height adjustment	**Adjustable-height lower shaft, with a row of holes and a locking clip**
Tip	**Black rubber ferrule at the foot**
On request	*Height range, Cuff and handle adjustment, Maximum user weight, Sizes available and 1 more*

SECTION Mobility Aids

WALKING STICK WITH FOUR LEGS

A walking stick with four legs (a quad cane), for people who need more stability than a single-tip stick gives, in rehabilitation, long-term use and at home.

KEY FEATURES

- Four-legged base gives a wide, stable footprint, so the stick can stand upright on its own.
- Four grey rubber tips with a ridged, non-slip underside grip the floor firmly.
- Moulded T-shaped black handle that is comfortable to hold.
- Slim telescopic shaft that adjusts in height with a row of holes and a push-pin lock.

SPECIFICATIONS

Type	**Walking stick (quad cane) with four feet**
Shaft	**Slim black metal shaft, telescopic**
Height adjustment	**Adjustable-height shaft, with a row of holes and a push-pin lock**
Handle	**Black moulded T-shaped handle with a red ring at the base**
Base	**Four-legged base: a flat black plate with four splayed legs**
On request	*Height range, Base size, Maximum user weight, Material and 2 more*

BANDAGES & WOUND CARE

The everyday essentials of dressing and support.

ABOUT THIS SECTION

Gauze, conforming, crepe, PBT and self-adhesive bandages, wound dressings, ice and kinesio tape, in the sizes clinics actually order. Rolls and widths are listed so you can reorder the same size next month without a phone call.

WHO IT IS FOR

Clinics, pharmacies, sports teams, schools and industrial first-aid rooms.

A PRACTICAL TIP

Most dressing rooms burn through three widths. Standardise on them and keep a smaller stock of the rest.

SECTION Bandages & Wound Care

PBT BANDAGE

A PBT bandage, supplied in wide white rolls for dressing and supporting wounds and limbs in hospitals, clinics, emergency care and home care.

KEY FEATURES

- Soft, textured fabric that is gentle to handle and easy to wrap.
- Open-weave surface that lets the dressing beneath breathe.
- Supplied in wide rolls, wound tightly around a hollow core.
- Rolls of matching width, so stock is easy to organise and use.

SPECIFICATIONS

Type	**PBT bandage, supplied in rolls**
Material	**PBT (polybutylene terephthalate) fabric, as named**
Colour	**White**
Fabric	**Soft, textured, open-weave fabric surface**
Form	**Wide, tightly wound roll with a hollow core**

NON-WOVEN SELF-ADHESIVE BANDAGE

A non-woven self-adhesive bandage, supplied in wide rolls for wrapping and supporting limbs and holding dressings in place in hospitals, clinics, sports care and home care.

KEY FEATURES

- Self-adhesive, as named, so the bandage holds in place without clips or tape.
- Soft, crinkled, textured fabric that is gentle to handle and easy to wrap.
- Wide rolls wound on a white cardboard core.
- Six colours shown: peach, green, purple, white, pink and tan, for easy identification of rolls or patients.

SPECIFICATIONS

Type	**Non-woven self-adhesive bandage, supplied in rolls**
Material	**Non-woven fabric, as named**
Adhesion	**Self-adhesive, as named; a roll is shown unrolled with its textured face visible**
Surface	**Soft, crinkled, textured surface**
Core	**White cardboard core, open in the centre**
Roll shape	**Wide, cylindrical roll, about as tall as it is across**

JUMBO GAUZE ROLL

A jumbo gauze roll, a large white roll of soft gauze-type fabric for dressing wounds and padding in hospitals, clinics, emergency care and home care.

KEY FEATURES

- Large roll gives plenty of material, so one roll goes a long way.
- Soft, light fabric that is gentle to handle.
- Unwind and cut to the length needed for each dressing.
- Clean white finish that makes any marks easy to spot.

SPECIFICATIONS

Type	**Jumbo (large) gauze roll**
Colour	**White**
Fabric	**Soft, light gauze-type fabric in fine layers**
Form	**Large cylindrical roll with a small hollow core**
